# Introducing arq plus

- arq plus is a cloud-based Content and Workflow Management System designed for use in the publishing space
- arq plus follows a content-agnostic design philosophy and provides a safe place for all of your content to be created and live.
- arq plus helps you get more value from your content by making it easier to create, organise, enrich, discover and deliver.
- arq plus is built on a solid industry standard platform that will continue to improve over time.

# Create and Store Content

- »»» ARQ+ lets you store an unlimited amount of content.
- »»» Quickly create the metadata associated with content using the in-browser tools, pipelines, browser uploads and API.
- »»» ARQ+ uses metadata as the primary way to identify content so that you can find the same content in multiple ways  
Set metadata at the resource level or on groups of resources
- »»» All content types can be supported with customizations for academic publishing
- »»» All assets are versioned and you can see the full audit history on each resource.
